The Victorian Foundation for Survivors of Torture

Refugee Health Nurses Training 2010

The Refugee Health Nurse training is a two year program, divided into themed modules. The program aims to provide an overview of the key areas of refugee health and wellbeing relevant to Refugee Health Nurses and other nurses who are working with people of a refugee background.

The two day introductory course has been planned again due to demand around the needs of community based nurses who are seeking an overview of refugee health and wellbeing to inform their practice.

The subsequent sessions over 2010 will be open to all nurses working in refugee health who have undertaken introductory sessions in 2010 or previously.

It is an exciting time to be working in refugee health as the sector develops and there are new developments in a range of clinical and social health areas, relevant to nursing practice. The training days will provide an overview of emerging research, policy and service development in refugee health as well as the opportunity to share valuable practice experience.
